

COMING SOON

DROOPLE iLink® NB-IoT Plug-In

The water monitoring revolution.

HOW IT WORKS

Seamless connectivity, with the possibility of measuring with up to **3 sensors at once!**

Flow

CO2 Pressure

H2O Pressure

Conductivity

SMART DEVICE "Making the invisible, visible"

4G NETWORK "Data's highway"

Last Mile Grid for any water point

>Connected
>Intelligent
>Easy-to-Use

Automatic insights with machine learning.
24/7 alarms for tailored anomalies, automated consumable replenishment and reduction of unplanned interventions

Problem-solving

- Easy to install (no gateway)
- Cost efficient
- Wide range of applications

Connectivity

- NB-IoT , based on LTE 4G network
- Integrated in product
- Valid in 150+ countries

iLink specs

- Connection to 3 sensors at once with AC plug
- Measures flow, pressure, temperature and conductivity
- Always up-to-date with OTA firmware update
